FUJIFILM INK SOLUTIONS GROUP

# Your expert partner in inkjet

Fujifilm supplies high-performance inks, pigment dispersions and contract manufacturing services to OEMs, integrators and ink manufacturers developing next-generation products for digital print.

Our global expert teams, development resources and operations are focused on delivering performance-driven inks and dispersions to enable your success in inkjet.

### Inkjet solutions you can rely on

With decades of proven ink technology performance in thousands of print systems, we are a trusted, 100% inkjet-focused partner able to supply for inkjet developments at the largest scale - reliably and in collaboration with you.

### Partnering with Fujifilm means:

Reliable, consistent, high-quality products

Inks and dispersions delivered with Fujifilm standards, to specification, every time.

Long-term inkjet partner

Backed by robust infrastructure, and investment in our operations for future security.

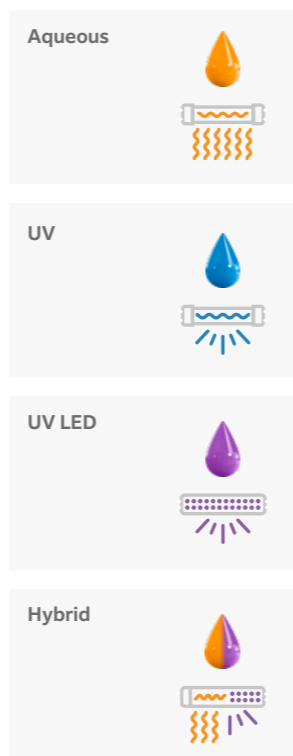

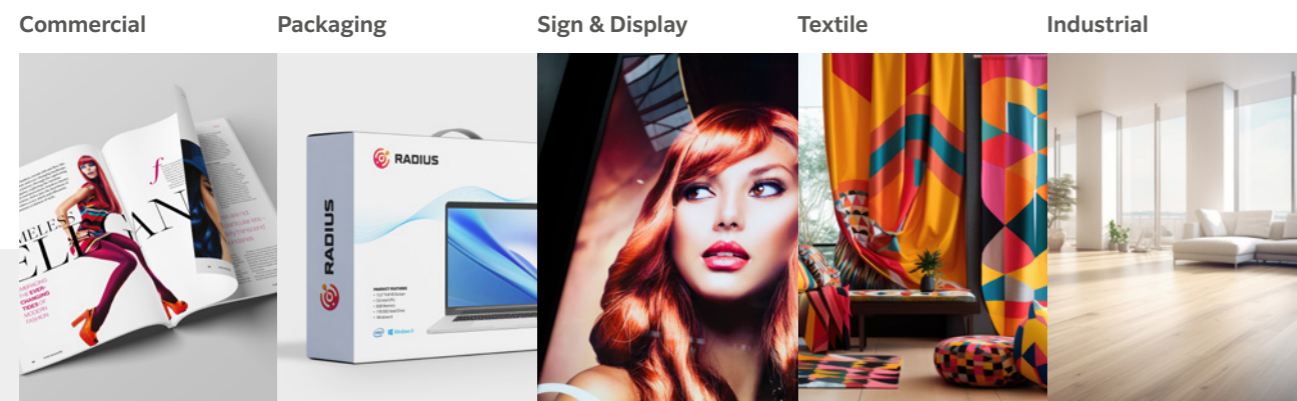

Regulatory confidence

Keeping you in pace with regulation to ensure continued compliance.

### Ink technologies for real-world performance

Across multiple sectors and diverse print applications, we deliver tailored inkjet solutions that meet the highest technical and commercial demands.

## Inkjet inks

### Developed and validated for real-world performance

Whether you are developing a new platform or enhancing an existing system, Fujifilm delivers inks to your application, printhead, and system requirements.

We offer a portfolio of system-ready ink solutions, and comprehensive custom ink developments through a Project-Based Ink Development™ program.

## Pigment dispersions

### A stable foundation for your ink formulation

Fujifilm offers a range of high-quality inkjet pigment dispersions for companies formulating their own inks.

Engineered with proprietary dispersant technologies for exceptional stability, they offer chemists the ultimate flexibility to achieve the technical performance required to meet even the most demanding inkjet applications.
